Projects & Spares

EWART GLOBAL SERVICES LTD – AN INTRODUCTION

For over 100 years Ewart has been supporting the worlds sugar industry. Our brand is present from the fields and cane yards, through to the bagging and storage areas in factories and in every cane growing region on earth

We are now growing our service offering to our customers through the launch of our 'Projects & Spares 'service. Through this service we are able to offer our customers an enhanced package for any requirements within the sugar process.

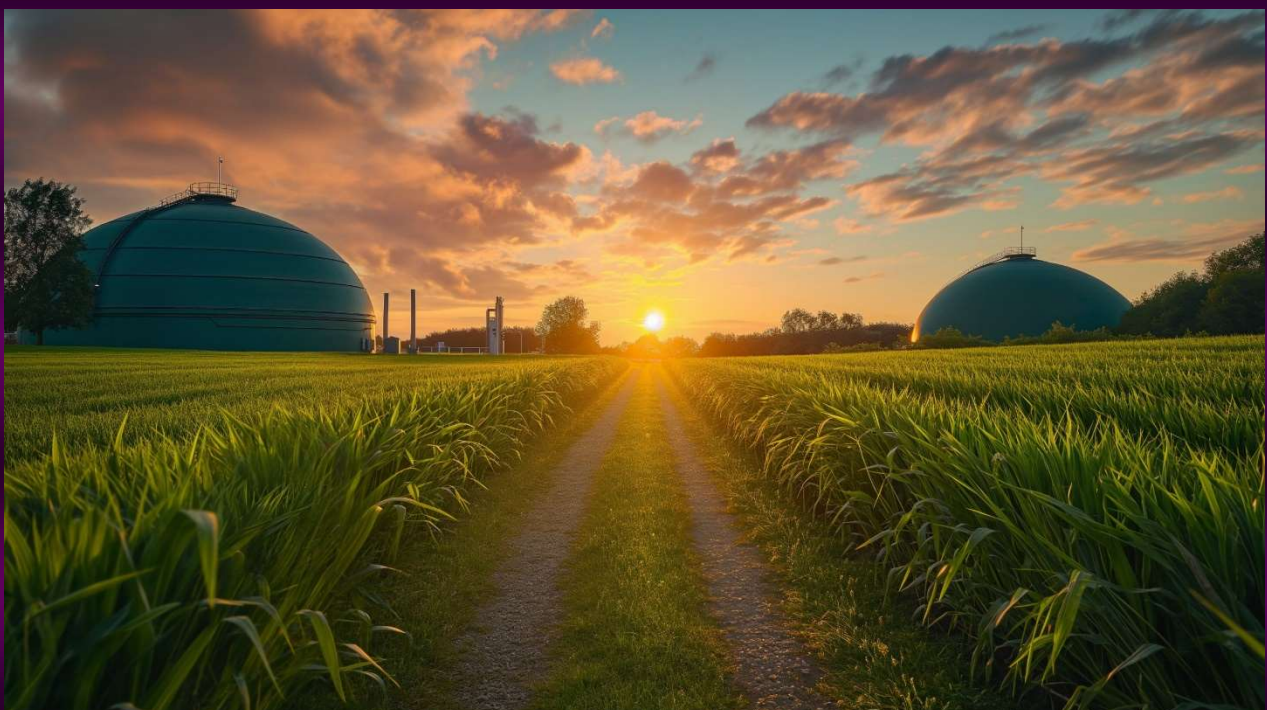

EWART is a leading and long-established brand in today's increasingly efficiency driven sugar industry.

Ewart Global Services Limited operates the business management, consulting and services functions of the global Ewart brand. Our team of specialists are available to support your sugar & bioenergy needs.

Ewart Global is headed up by our group Chairman, Mr Mike Horton.

Decades of sugar technology and across the whole range of business management including increasing efficiency, financial management, merger & acquisition.

Our consultancy services are available for any sugar or bioenergy project.

Our services have been built through working in the sugar industry for over 140 years. Established in Derby in the UK in 1879 we became synonymous with the highest technology in carrier, elevator and power transmission chain. This technology was established hand in glove with working and living at factories around the world. Today we are active in over 100 countries worldwide.

Ewart Global Services are now supporting sugar factories with a solution-based advisory & support service. Our aim is to add value for our customers across the entire process, across different technologies using our core specialisms:

- Technical Sales and Support
- Manufacturing
- Quality, Technical and Engineering
- Logistics
- Finance and Management

Consultancy & Project Management

The breadth of experience and knowledge of the Sugar Industry within the Ewart Team, and with Mr Horton, means Ewart are perfectly positioned to offer an advisory and consultancy service to existing sugar factories.

Ewart promote a 'solution-based' approach to the factory issues. Our methods could include:

- Identifying operational constraints through data collection & gap analysis.
- Issues of sugar process.
- Issues faced in factory management.

Our work would combine sugar process know how with long standing business management experience.

An example of this would include identifying the steps needed to improve a factory efficiency ahead of implementing a Co-Generation plant to the site. Having a highly efficient sugar process with high mechanical reliability is a game changer to optimise revenue in a co-generation business.

Engaging in consultancy services with Ewart also opens opportunities for ongoing support with projects in hand. Ewart can assist with communications to third parties, project planning and time management.

For example, Ewart would have a 'hands on' approach to supporting the factory during the time of change as it implements the changes and improvements required prior to a Co-Gen implementation.

Working with suppliers of new equipment, communicating progress to the local factory teams and keeping the project on time and on budget.

Again, adding value at every level and ensuring a more successful future.

Essential Services

Key considerations for our success are sugar knowledge, sourcing, logistics and After Sales Support.

Sourcing

Our skilled team have a truly global network of equipment & service providers. Pre-audited and ready to perform.

Whether it is raw materials, replacement equipment, maintenance services - we have a solution!

Our commitment to provide good value and quality goods compliments our ethos of adding value to the factory at every opportunity.

What we can offer

We can provide a complete 'single source' procurement service alongside our current range of drive, conveyor and elevator chain.

Cane Preparation & Extraction:

- Unloader System Spares
- FCC, MCC & ACC Conveyor
- Drives
- Cane Knife & Shredder Spares
- Shredded Cane Carrier
- Spares
- Milling & Diffuser Spares
- Pumps & Spares for Raw
- Unscreened & Weight Juice
- Mill & Diffuser Drive Spares (turbine, gearing, hydraulic, motor).

Filtration & Clarification:

- Rotary Juice Screens
- Cush-Cush Conveyors
- DSM Screens
- Clarifier Spares
- Rotary Mud Filters
- Dosing Systems/ Spares

Evaporation:

- Brix/Measurement
- Tubes
- Valves
- Entrainment
- Level Measurement

Boiling House:

- Brix/Measurement
- Pan Tubes
- Valves
- Massecuite Pumps
- Melters & Mingler Spares
- Crystalliser Spares
- Molasses Pumps & Spares
- Centrifugal Spares

Centrifugals & Drying:

- Centrifugal Spares
- Drter Spares
- Rotary Dryer Rings
- Vibratory Dryers
- Elevator Spares
- Weighing & Bagging Spares
- Sugar Store Conveying

Power House:

- Boiler Spares
- Turbo Generator Spares
- Turbo Generator Services
- Boiler & Turbine Control Upgrades
- Turbo Generator Overhauls

Logistics

Our logistics team manage huge volumes of freight with our partners every year. Whether courier, air, sea or multi modal freight is needed, we ensure safe, secure deliveries to the most difficult locations. Our logistics team will ensure goods arrive on time, in full and in perfect condition.

After sales Support

Customer service is paramount. Ewart will regularly attend site in person and have an extensive network of local representation available.

We can work on “one off” requirements through rolling procurement service agreements. Whatever the arrangement that is needed we approach everything as part of a long-term partnership philosophy to resolve factory issues in the best way.

Our customers can enjoy the ease of one point of contact, planned receipt dates and economic, consolidated deliveries with reduced procurement, administrative & banking costs.
